Role Overview

As an **Windows Software Engineer** you will join the core engineering team of Mobile Jazz. You will work closely together with other mobile developers and backend engineers, as well as with UX experts and graphic designers on delivering excellent consulting work for our international clients.

Requirements

- Excellent engineering skills
- Strong CS fundamentals (data structures, algorithms, design patterns, etc.)
- Development of Windows Universal Apps (UWP) using C#
- Creation of Windows Runtime Components using C++
- UI design using XAML, especially customization of control templates
- Creation of custom User Controls
- LINQ query language
- Multilanguage app development
- Knowledge about Entity Framework Core
- Proven experience in developing and shipping Windows Phone 8+ applications
- Personal projects that show an aptitude for engineering and product sense
- Motivated and proactive candidate with ability to work within the team
- Experience with Git and project management tools (Jira, Asana)
- University degree in Engineering, Computer Science or Technical Field is desirable
- Experience with Android, iOS, web or back-ends is a plus
- Excellent English and communication skills

How to Apply

Submit your application by sending a *POST HTTP* request to
`https://mobilejazz.com/jobs/apply` with Content-Type set to "`application/json`", and a *JSON* document as body with the following keys:

- "`name`": Your real name as a String.
- "`email`": Your email address where we can contact you as a String.
- "`about`": Why you're interested in this position and why you think you're the right person to get the job done, String.
- "`urls`": Array of Strings, with URLs describing yourself. You can include as many as you want, like your LinkedIn profile, GitHub, BitBucket, MasterBranch, etc.
- "`teams`": Array of Strings, with one or many teams that apply to teams that you wish to apply for. The values must be amongst the following: android, ios, windows, backend, frontend, design.

About Mobile Jazz

We believe that mobile is the next big thing and are working on a range of products and services to disrupt existing industries with fresh concepts and new technologies.

The people behind Mobile Jazz have been working in Mobile Technology since the advent of the modern smartphone in 2008. During the past years we have gained a vast range of experience and in-depth knowledge within all major mobile platforms. We are highly proficient across iOS & Android, enabling us to innovate in the mobile sector.

We are a distributed team of highly skilled engineers, designers and marketing experts with headquarters in Barcelona and satellite offices in the United States, Dubai, Germany, Austria and Poland. We have a beautiful 9th floor office in the center of Barcelona, equipped with a kitchen and a (mostly) sunny terrace as well as a Wii U for the mental breaks and we embrace flexible schedules and remote working.
